SUMMARY

Product designer with 5+ years shipping mobile and web products end to end on small, fast-moving teams. Lead designer on Capzy, a native AI captioning app; before that, designed a bank OTP app with 2M active users and the design system behind it. Former iOS developer who prototypes with AI tools.

EXPERIENCE

Unitedreams Inc. · Product Designer · Toronto, ON · Sep 2024 – Present

- Lead designer on Capzy, a native iOS and Android AI captioning app rated 4.8 on the App Store and 4.5 on Google Play across 3,000+ ratings.
- Designed the home, account, and upload / AI-processing flows from scratch and shipped them end to end, working with engineers and the PM from first flow to annotated handoff.
- Evolved the Figma design system with engineering, reducing front-end rework by 20%.
- Brought designers into flow planning earlier, changing how the team works.

Carrene Corp · UI/UX Designer · Tehran, Iran · May 2021 – Sep 2024

- Started as the only designer on a 4-person team and designed a native iOS and Android OTP app for banks, now used by 2M active users, as the team grew to about 15.
- Built a three-layer token design system (primitive, semantic, component) used across all three bank apps; colour bugs dropped from 4–5 to 0.
- Themed one set of flows for multiple banks (colour, logo, type, corners) without redesigning the flows.
- Raised a no-SIM activation edge case (e.g. iPad users) and proposed an SMS alternative within the banks' security rules.

AI PROTOTYPING PROJECTS

- **Gorbeh:** a goal-setting app with daily targets, weekly to-dos and progress, designed and built as a working app with Claude.
- **Tooti:** a Duolingo-style nutrition coach that logs meals by photo and tracks macros, designed and built with Claude.

SKILLS

Product design: end-to-end flows, interaction and visual design, rapid prototyping, responsive design
AI tools: prototyping working apps with Claude
Platforms: iOS and Android (Apple HIG, Material Design), responsive web
Tools and systems: Figma (Auto Layout, Variables, Prototyping), design systems, design tokens
Collaboration: cross-functional teams with product managers and engineers, annotated handoffs, Agile/Scrum
Accessibility: WCAG 2.1 AA, AODA

EDUCATION

B.Sc. Computer Engineering, Mazandaran University of Science and Technology · 2011 – 2015
Google UX Design Professional Certificate, Coursera · 2026
