SUMMARY

Product designer with 5+ years designing native iOS and Android apps. At Carrene, designed a bank OTP app with 2M active users and built the design system behind it. Now lead designer on Capzy, a native AI captioning app. Former iOS developer who plans for edge cases and developer handoff from the start.

EXPERIENCE

Unitedreams Inc. · Product Designer · Toronto, ON · Sep 2024 – Present

- Lead designer on Capzy, a native iOS and Android AI captioning app rated 4.8 on the App Store and 4.5 on Google Play across 3,000+ ratings.
- Designed the home, account, and upload and AI-processing flows from scratch and shipped them end to end, working with engineers and the PM from first flow to annotated handoff.
- Designed a language check before upload: the app detects the video's language and asks people to confirm it, so a wrong guess is caught before the AI starts.
- Evolved the Figma design system with engineering; front-end rework dropped 20%, based on the data team's numbers.
- Joined product planning early, before engineering work started.

Carrene Corp · UI/UX Designer · Remote · May 2021 – Sep 2024

- Designed native iOS and Android OTP apps for banks, now with 2M active users. Started as the only designer on a team of 4 that grew to 15.
- Built a three-layer token design system (primitive, semantic, component) used across all three bank apps; colour bugs dropped from 4–5 per release to 0.
- Themed one set of flows for two apps, a single-bank app and a multi-bank app (colour, logo, type, corners), without redesigning the flows.
- Designed the code countdown so the last 5 seconds turn red, telling people to use the code now; the seconds always show as a number, so the warning does not rely on colour alone.
- Raised a no-SIM activation edge case (e.g. iPad users) and proposed email activation. The banks' security teams did not approve it, and the team later found a way to deliver the code in the app.

SKILLS

Product design: end-to-end flows, interaction and visual design, prototyping, responsive design
Platforms: iOS and Android (Apple HIG, Material Design), responsive web
Tools and systems: Figma (Auto Layout, Variables, Prototyping), design systems, design tokens
AI tools: prototyping working apps with Claude
Collaboration: cross-functional teams with product managers and engineers, annotated handoffs, Agile/Scrum
Accessibility: WCAG 2.1 AA, AODA

EDUCATION

B.Sc. Computer Engineering, Mazandaran University of Science and Technology · 2011 – 2015
Google UX Design Professional Certificate, Coursera · 2026
