SUMMARY

Product designer with 5+ years designing native iOS and Android apps, including offline one-time-password apps that secured card transactions for 2M+ users and Capzy, an AI captioning app rated 4.8 on the App Store. I evolve design systems in Figma with design tokens, design to Apple HIG and Material Design, and deliver annotated handoffs that meet WCAG 2.1 AA and AODA. I want to bring that mobile-first, accessible approach to my next team.

EXPERIENCE

Unitedreams Inc. Sep 2024 – Present
Product Designer Toronto, ON

- Designed core flows and interfaces for Capzy, a native iOS and Android AI captioning app rated 4.8 on the App Store and 4.5 on Google Play across 3,000+ ratings.
- Evolved a mobile-first Figma design system for a suite of native apps, working closely with engineering to reduce front-end rework by 20%.
- Designed accessible, privacy-first flows that meet WCAG 2.1 AA, AODA, app store privacy requirements, and EU data regulations.
- Mapped customer journeys, service blueprints, and future-state workflows to align product managers, engineers, and business stakeholders before build.
- Changed how the team works by bringing designers into flow planning earlier and adding more frequent design sessions.

Carrene Corp May 2021 – Sep 2024
UI/UX Designer Tehran, Iran

- Designed native iOS and Android offline one-time-password (OTP) apps that secured card transactions for 2M+ users, following Apple HIG and Material Design from wireframes and high-fidelity mockups to annotated developer handoff.
- Built a unified design system of 20 components used across three bank apps, speeding up handoff and sharply reducing the color and style inconsistencies reported by QA.
- Contributed to a login redesign that reduced fraudulent login attempts.
- Scoped features, created wireframes, and contributed to the product roadmap for OTP functionality.
- Prepared VPAT accessibility documentation for an enterprise product to support procurement and compliance reviews.
- Tracked product KPIs in dashboards and used the findings to guide design decisions.

SKILLS

Mobile: Native iOS & Android, Apple Human Interface Guidelines, Material Design, Mobile-first design

Design: Figma (Auto Layout, Variables, Prototyping), Design systems, Design tokens, Wireframes, High-fidelity mockups, Interactive prototypes, Interaction & visual design, Information architecture

Accessibility: WCAG 2.1 AA, AODA, VPAT, Section 508, Inclusive design

Research & delivery: Journey maps, Service blueprints, Annotated handoffs, Agile/Scrum, Collaboration with developers and stakeholders

AI workflow: Figma AI, Figma Make, Cursor, Claude Code

EDUCATION

B.Sc. Computer Engineering, Mazandaran University of Science and Technology 2011 – 2015

Google UX Design Professional Certificate, Coursera 2026
